PROFESSIONAL SUMMARY

- Frontend React Developer with hands-on experience building an Admin Dashboard using React.js, Tailwind CSS, Context API, and Axios, integrated with RESTful APIs for user management and authentication.
- Developed responsive and reusable UI components including forms, loaders, tables, and protected routes to ensure scalable application structure
- Implemented full CRUD functionality with image upload, form validation, and real-time user feedback using React Hot Toast.
- Applied modern frontend practices such as API integration, JWT authentication handling, and responsive UI design
- Passionate about building efficient, user-friendly, and mobile-responsive web applications through real-world project experience.
- Fluent in English and French

PROFESSIONAL EXPERIENCE

Frontend React Developer (Projects & Training) Present

January 2026 –

Personal Projects | Montreal, QC

- Developed a full-stack Admin Dashboard frontend using React.js, Tailwind CSS, and Axios, integrating REST APIs for complete User Management (CRUD) operations including create, read, update, delete, and image upload functionality.
- Built reusable components such as User Form, Loader, and User Table to improve code reusability and maintainability across the application.
- Implemented protected routes using JWT authentication and Context API to manage user sessions securely.
- Integrated backend APIs to handle user data and profile images using Form Data

and Axios interceptors

- *Developed responsive pages (Users, Add User, Edit User, User Profile) with dark mode support and mobile-first design principles.*
- *Enhanced user experience by implementing loading states, toast notifications, form validation, and confirmation dialogs for critical actions.*

PROJECTS

Admin Dashboard – Frontend (Internship Mini Project)
2025– January 2026

November

Link-to-project.com

- Built a full CRUD-based User Management System using React.js, Tailwind CSS, Axios, and Context API, integrating REST APIs for authentication and data management.
- Developed reusable components (UserForm, Loader, UserTable) to improve code reusability and maintainable application structure
- Implemented features including image upload, form validation, protected routes, and JWT authentication handling for secure user management.
- Created responsive and mobile-friendly UI with dark mode support using Tailwind CSS and Material UI icons.
- Integrated backend APIs for user operations (create, read, update, delete) and managed application state using React Context API.
- Purpose: To build a real-world Admin Dashboard system with complete user management, API integration, and modern frontend development practices.

TECHNICAL SKILLS

Programming Languages: *JavaScript (ES6+).*

Frontend Technologies: *HTML5, CSS3, Tailwind CSS, Axios.*

Version Control : *Git & GitHub*

Software, Applications, Tools: *Visual Studio Code, React.js, Spring, Eclipse, Postman,*

Trello

Databases: MySQL

Visualization, Cloud and AI: IBM Cognos Analytics, IBM Cloud, Azure AI Foundry

Project Management: Agile, Scrum, Kanban

EDUCATION & CERTIFICATIONS

• Microsoft Azure AI900 Professional Certificate June 2025

Full Stack Java Developer – Certificate March 2025 – October 2025

Master's degree in computer science

June 2016 – July 2018

Bharathidasan University | India

Bachelor's degree in computer science

June 2013 – July 2016

Bharathidasan University | India

VOLUNTEER EXPERIENCE

Coordinator

May 2022 – September 2023

Kira Hospital | Buja, Bujumbura Burundi

- Trained hospital staff and patients with basic computer skills, improving digital

literacy and confidence.

- *Conducted hands-on training sessions on Microsoft Office (Word, Excel) and internet usage to support daily tasks.*
- *Explained basic IT concepts in a clear and simple manner, supporting individuals with limited technical knowledge.*
- *Developed easy-to-understand training materials and guides to support learning and retention.*
- *Supported hospital operations by improving staff productivity and reducing dependency on technical support*
